SUMMARY

MCA student with a strong foundation in AI, ML, and full-stack systems. Skilled in building data-driven, scalable applications, real-time processing, API design, and performance optimization. Focused on AIOps, observability, and intelligent monitoring for high-availability systems.

EDUCATION

Presidency University, Bangalore

cgpa:8.23

MCA - Master Of Computer Applications

2024-2026

Veer Kunwar Singh University, Ara (Bihar)

cgpa:7.54

BCA - Bachelor Of Computer Applications

2020-2024

SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Web & Backend Development:** React.js, Node.js, Express.js, Flask, HTML5, CSS3
- **Databases & Storage:** MySQL, MongoDB, Pinecone
- **AI & ML:** Machine Learning (Classification, Regression, Clustering), Generative AI, RAG Pipelines
- **Data Analytics & Visualization:** Pandas, NumPy, Data Visualization
- **APIs & Tools:** RESTful APIs, OpenAI API
- **Soft Skills:** Problem Solving, Team Collaboration, Time Management & Continuous Learning

EXPERIENCE

AI Chatbot with User Authentication and Chat History

June 2025 – Oct 2025

InternsForge — React.js, MongoDB, Node.js, Express.js

Remote

- Implemented and architected a full-stack AI chatbot platform with JWT authentication, role-based access control, and personalized chat history for 100+ active users across 3 project environments.
- Applied structured logging, error handling, and API monitoring to ensure system reliability.
- Worked with large conversational datasets, ensuring data consistency and secure access
- Configured a React.js frontend with Redux, improving navigation speed by 30% and increasing feature adoption by 50% among over 120 monthly sessions.

PROJECTS

Trading Application | React.js, Express.js, MongoDB

April 2024

- Built a MERN-based trading application supporting 500+ simulated transactions with secure JWT authentication and real-time updates.
- Simulated financial transaction workflows with strict consistency and validation checks.
- Designed APIs to handle real-time transaction events with low latency.
- Ensured accurate transaction state tracking and auditability.

Generative AI Chatbot | LangChain, Flask, OpenAI API, Pinecone

September 2025

- Designed a Generative AI chatbot using LangChain and databases (FAISS), indexing 5,000+ text chunks for retrieval.
- Integrated OpenAI GPT models for response generation, reducing response time to 1.2 seconds over 300+ queries.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline achieving 92% answer accuracy during internal testing.
- Deployed the chatbot with real-time session management and user history tracking for 50+ active test users.

Certificates

- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** — Demonstrated skills in data science workflows, model development, and OCI-based AI/ML tools.
- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** — Gained expertise in LLMs, generative models, and deploying GenAI solutions using OCI services.
